SYZMIK WORKWEAR

2017 RANGE

WORKWEAR THAT WORKS AS HARD AS YOU

At Syzmik we aim to deliver a workwear range that is tougher, more comfortable and better fitting than existing workwear clothing. We believe the best work clothes solve problems for the wearer, so we are constantly talking to our customer to better understand the way we can improve their life through clothing.

We pride ourselves on delivering the best quality product possible and that's why each and every product we produce goes through stringent quality testing to ensure the performance of the product is exceptional and deserving of the Syzmik name.

Innovation is at the heart of what we do so we are always researching and testing the latest fabrics to ensure we offer the best clothing possible, based on the latest technological advancements.

- ✓ PASSED — ABRASION TEST
- ✓ PASSED — PERSPIRATION
- ✓ PASSED — COLOUR FASTNESS
- ✓ PASSED — UV PROTECTION

Our workwear fabric quality is the foundation of our brand. To ensure each garment we produce has exceptional durability and longevity we test our fabric to the wide range of testing criteria described here. We only approve the fabric to go into production if it meets our high standards

We don't make claims we can't prove.

HIGH VISIBILITY STANDARDS

1906.4:2010

This standard explains the use of hi-visibility fabrics and retroreflective materials. It specifies the chromaticity levels to which fabrics need to be dyed in terms of performance and atmospheric pressures in order to comply to the standard. Natural fibre garments have a lower chromaticity level due to the nature of the fabric.

Class F = Daytime fluorescent / Class R = Retroreflective material
Class RF = Retroreflective and fluorescent / Class NF = High daytime visibility NON Fluorescent

4602.1:2011

This standard refers to how a garment is constructed using fabrics compliant to 1906.4 above. There should be no less then 0.2m² of unbroken hi visibility fabric on both the front and back of any garment that covers the upper torso. High visibility fabric must not be broken with non compliant fabric within the 0.2m² area from the top of the shoulders to the waist, so no full side panels at armpit level are permitted. This standard also explains the position of the retroreflective tapes on the garment, the width and quantity used. These tapes should not detract from the 0.2m² measurement required.

Class D = Daytime use / Class N = Night time use using retroreflective material / Class D/N = Day/night use

4399

This standard refers to the capability of a fabric to protect skin against solar ultra violet radiation (known as UPF = ultra violet protection factor). This standard is an additional bonus to the garment rather than an essential requirement for hi-visibility standards but often specified from specific industry users.

EMBROIDERY ON HI-VISIBILITY SAFETY GARMENTS: Excessively large logos may jeopardise the classification of the garment. Embroidery on wet weather jackets may also impair the waterproofing properties of the garment. Please seek professional advice.

USEFUL INFORMATION

To most people, a safety garment is a safety garment. Orange or yellow, big or small, it's all the same. Not all Hi Vis safety garments sold in the market today comply to the latest Australian and New Zealand safety regulation for Hi Visibility garments 4602.1.2011. Below are a few common examples of garments that would not pass the current 4062.1 2011 AU/NZ standard.

INCORRECT FLUORO AREA

Area of fluoro material should be no less than 0.2m² for front and back torso.

BROKEN TAPE

Retroreflective tape must not be broken or have gaps.

NON-FLUORO FABRICS

Dyed fabrics must meet chromaticity levels to comply with standards.

SYZMIK WORKWEAR COMPLIANCE

SHOULDER CONFIGURATION

Our garment design features:
- Compliant area of high visibility material
- Compliant levels of fluoro chromaticity
- Unbroken retroreflective tape in belt and brace configuration

HOOPED CONFIGURATION

Our garment design features:
- Compliant area of high visibility material
- Compliant levels of fluoro chromaticity
- Unbroken retroreflective tape in hooped configuration

Don't risk it! Make sure all of your garments are fully compliant to the Australia/New Zealand safety standard.

HI VIS DAY VISIBILITY

A garment that uses high-visibility materials for day use only. The high-visibility material encircles the upper torso. Complies with AS/NZ:

- 4602.1:2011 High-Visibility Safety Garment Construction Class D
- 1906.4:2010 High-Visibility Materials Class F
- 4399 UV Protection 50+

HI VIS DAY/NIGHT VISIBILITY

A garment designed for day and night use using retroreflected light with high-visibility material encircling the upper torso. Complies with AS/NZ:

- 4602.1:2011 High-Visibility Safety Garment Construction Class D/N
- 1906.4:2010 High-Visibility and Retroreflective Materials Class R/F
- 4399 UV Protection 50+

UPF 50+ RATING

Ultraviolet Protection Factor (UPF) - a rating designed for fabric and clothing that specifically measures the level of Ultraviolet Radiation transmitted through a fabric onto the skin.

UPF measures both UVA and UVB rays.

RIPSTOP TECHNOLOGY

Ripstop fabric provides increased tear and abrasion resistance through an innovative fabric weave. This weave allows the use of lighter weight fabrics to keep you cool while still maintaining a garment that will stand up to the tough jobs.

BREATHABILITY

Garments that allow more air to pass through the fabric thanks to innovative fabric design and garment construction. This allows the wearer to stay cool, dry and more comfortable while on the job.

ADVANCED KNEE PROTECTION

A garment with a knee pad provision and extra fabric reinforcing the knee area. This provides greater protection and comfort for those working on their knees.

CORDURA® REINFORCEMENTS

Cordura® is made from the highest tenacity fibre technology available. A garment with Cordura® reinforcements is built to last with exceptional resistance to tears and abrasion.

Cordura® can withstand more then 3 times the wear of traditional workwear fabrics.

WATERPROOF

A garment that uses water resistant fabrics and coating to prevent water coming through the outside layer.

All Syzmik waterproof garments are seamsealed to prevent water entering through the seams and ensure protection from the elements.

TTMC-W NEW ZEALAND

A garment that complies with TTMC-W code of compliance requirement on New Zealand roads. They also comply with AS/NZ:

- 4602.1:2011 High-Visibility Safety Garment Construction Class D/N
- 1906.4:2010 High-Visibility and Retroreflective Materials Class R/F
- 4399 UV Protection 50+

GENERAL CARE

The right care and storage of your workwear is important for it's durability, function and long term comfort.

WASHING

Every garment has specific washing instructions which are suited to the particular garment's material and design. Ensure that zips, buttons and quick close tape closures are closed when the garment is washed to reduce wear and tear.

DRYING

It is recommended to dry the garment flat or hung up to reduce the risk of shrinkage.

USEFUL INFORMATION

DESIGNED BY WOMEN. FOR WOMEN.

Look out for Syzmik's range of dedicated ladies styles, as well as smaller unisex styles for the petite.

RUGGED COOLING

Introducing Rugged Cooling – Syzmik's heat stress management range that increases breathability by over 110% while also increasing tear strength by more than 70%.

Heat Stress is the single biggest problem affecting our customers at work. Heat stress is not only uncomfortable but can result in serious injury or even death in extreme cases.

Under the workplace health and safety act 2011 (AS) it is the legal obligation of employers to put plans in place to mitigate the heat stress risk.

Syzmik's Rugged Cooling range of works shirts and pants changes the way cool workwear is developed.

When we started to look for a better solution to heat stress we first had to understand the way the body cools itself which is primarily through the evaporation of sweat.

So to aid the body in cooling, we set out to create a fabric that would increase breathability to not only keep the wearer cooler but also allow the body's sweat to evaporate and dry quicker.

The fabric we use is a 100% cotton, produced in a square weave construction that allows the maximum amount of air to pass through the fabric.

Added features like extensive mesh venting and vented tape increases the breathability of our range even further.

We then set out to make our fabric more durable and developed a ripstop construction in the fabric which uses thick reinforcing thread through out to make the fabric stronger while not limiting the breathability.

The result of all this development is a range that is not only cooler and more comfortable but also actually stronger than traditional workwear.

SYZMIK STREETWORX

Inspired by the Street, Designed to Work.

The Streetworx range is a whole new kind of workwear that has been made with freedom in mind.

Why should your work clothes have to be different from your street clothes?

The Streetworx range has been designed to look as stylish as any street or fashion clothing but with the functionality and durability you need at work. With Streetworx you have the freedom of wearing the same clothes that you wear to work, to the gym, to the pub, skateboarding, bike riding anywhere you want.

The Streetworx range uses fabrics that give noticeable lightweight stretch so you can work with increased freedom of movement, no more splitting pants when bending down or feeling restricted when reaching overhead.

Freedom to move, **Freedom** to have your own style, **Freedom** to go anywhere.

Sizes	S - 5XL, 7XL
Colours	Navy, Orange, Yellow

Fully seam sealed • Waterproof rating 5,000mm • Elasticated waist • Twin needle stitched reflective tape • Ankle zip opening

LAYER UP

Using a layering system of clothing gives you more flexibility during your day so you can add and remove layers as needed depending on the weather and work conditions.

3RD LAYER/ OUTERLAYER:

Your outer layer is your last layer of defence to protect you from the elements. You want a garment with good waterproof rating and fully seam sealed.

We recommend:
ZJ357 Ultralite Waterproof Jacket (For Warmer Climates)
ZJ350 Storm Jacket (For Colder Climates)

2ND LAYER/ MID LAYER:

Your mid layer provides added warmth to your base layer. A perfect mid layer should be breathable and stretchy, providing unrestricted movement.

We recommend:
ZT810 Stretch Micro Fleece ¼ Zip

1ST LAYER/ BASE LAYER:

Your base layer should be something that can be worn on its own if it gets too hot during the day. You want a garment that is breathable, moisture wicking and comfortable next to the skin.

We recommend:
Any of our range of Syzmik Polos

ENGINEERED OUTER WEAR

ZJ590 MENS HI VIS COTTON DRILL JACKET

Sizes 3/77 – 12/122
Colours Orange/Navy

Unique square weave fabric and venting allows increased air flow to cool you down while the rip stop construction gives the light weight fabric more tear strength than heavy weight pants • Large under arm and back venting to keep you cool • Mechanical stretch to give you more freedom of movement • Mobile phone pocket • Reflective tape in H configuration • Double layer hem for durability • Reinforced at all key stress points with bar tacks

ZC606 MENS TTMC-W COTTON OVERALL

CLASS D/N

UPF 50+

Fabric 100% Cotton Drill - 190 gsm
Sizes 3/77 – 12/122
Colours Orange/Navy

Lightweight cotton drill fabric provides durability and comfort • One chest pocket with quick close tape fastening • One chest pocket with vertical zipper for easy access • Large cargo pocket on side leg with quick close tape fastening • Triple stitching at crotch for extra durability • Two side hip pockets • Two side access pockets to reach your internal pant pockets • One back hip pocket

ZW125 MENS TTMC-W DRILL WORK SHIRT

CLASS D/N

UPF 50+

Fabric 100% Cotton Twill - 170 gsm
Sizes S - 5XL, 7XL
Colours Orange/Navy

170gsm mid weight Cotton twill to keep you cool while still being tough enough for any job • Underarm and upper back mesh vent inserts to keep you cool in any environment • Triple stitched seams • Reflective tape in H configuration • Two chest pockets with button closures and pen partition • Fade tested

ZH540 MENS TTMC-W SEGMENTED L/S POLO

Fabric	100% Polyester - 175 gsm
Sizes	XXS - 5XL, 7XL
Colours	Orange/Navy

144 Filament supreme microfibre polyester • Ultra-comfortable segmented tape stretches and moves with you • Highly breathable and quick dry • Chest pocket with pen insert

ZH243 MENS TTMC-W S/S POLO

Fabric	100% Polyester - 175 gsm
Sizes	S - 5XL, 7XL
Colours	Orange

144 Filament supreme microfibre polyester • Moisture wicking properties • Highly breathable and quick dry • Reflective tape in H configuration • Chest pocket with pen insert

TTMC-W NEW ZEALAND

ZH242 MENS TTMC-W L/S POLO

Fabric	100% Polyester - 175 gsm
Sizes	S - 5XL, 7XL
Colours	Orange

144 Filament supreme microfibre polyester • Moisture wicking properties • Highly breathable and quick dry • Reflective tape in H configuration • Chest pocket with pen insert

ZV960 MENS TTMC-W ZIP VEST

Fabric	100% Polyester - 175 gsm
Sizes	XXS - 5XL, 7XL
Colours	Orange

Tough zip front opening • Clear Id pocket on chest • Perfect to keep in the car to make sure you always comply with any worksites standards • Garment complies with TTMC-W for the code of compliance requirement on New Zealand roads

ZV997 MENS TTMC-W BASIC VEST

Fabric	100% Polyester - 175 gsm
Sizes	XS - 3XL, 5XL, 7XL
Colours	Orange

Quick release quick close tape front fastening • Reflective tape in H configuration • Garment complies with TTMC-W for the code of compliance requirement on New Zealand roads • Perfect to keep in the car to ensure you always comply with any work sites standards

FIRE ARMOUR®

Syzmik's Fire Armour® range has been created to offer the highest level of performance possible while addressing the major complaints that consumers have had about existing FR products available.

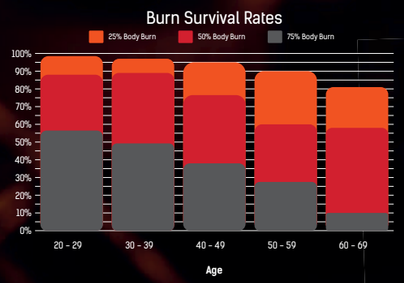
As well as delivering on uncompromising protection, Syzmik Fire Armour® takes a leap forward in current FR solutions with fabrics that solve the issue of heat stress and comfort.

FR clothing is needed to protect workers who may be exposed to the risk of fire or arc flash. If non FR clothing, such as cotton is worn when exposed to these risks it will increase the injuries suffered from the incident. Non FR clothing will continue to burn after the source of the flame has been removed at an increasing rate, until all flammable material is consumed.

The flame from the continued burning of cotton or other non FR clothing will often cause more intense burns than the original incident itself. Burning clothing will also cause injuries to areas of the body that had not been exposed to the original incident.

FR clothing's key characteristic is that it will self-extinguish when the source of the flame is removed. Good FR clothing should also resist ignition, not melt, drip or break open when exposed to fire or arc flash. These characteristics greatly improve the survival rates and outcomes of anyone exposed to arc flash or flash fire. FR clothing will not prevent all injuries in the case of a flash fire or arc flash incident but they will significantly reduce the injuries and give the wearer an ability to escape the incident.

The graph below illustrates the importance of minimising the severity of burns:



Source: American National Burn Repisortry 2012 report

FIRE ARMOUR

RED FLAME FIRE RESISTANT RANGE

METATech® RED FLAME RANGE

The exclusive METATech® fabric used in the Syzmik's Fire Armour® Red Flame range provides revolutionary levels of inherent arc and flash fire protection at an incredibly light weight of 155 GSM.

METATech® ‹ Look out for styles with this logo

All the garments in Syzmik's HRC 1 rated FR range use the exclusive METATech® fabric to give unbelievably light 155gsm HRC 1 – 6 Cal protection.

ONLY FR RATED COMPONENTS USED

No corners have been cut when making the Syzmik Fire Armour Red Flame range as we take the performance of our products seriously. All products in the range use fully FR rated trims including, reflective tape, snaps, buttons, zippers and even FR heat seal logos.

DESIGNED TO MINIMISE EXPOSURE

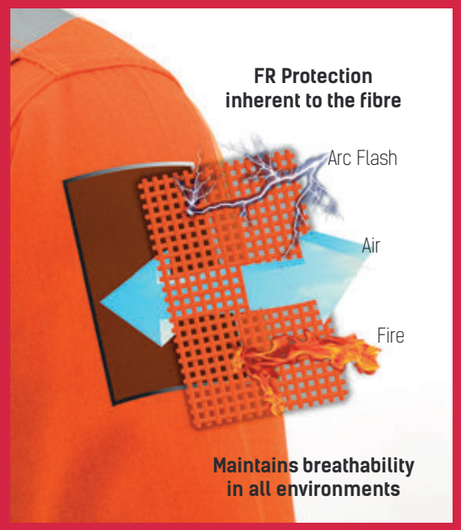
All products feature gusset sleeves that make it difficult for employees to roll up and wear incorrectly.

GARMENTS CAN BE REMOVED QUICKLY

The garments have also been designed to be quickly removed in case of emergency so we have used FR press studs on the shirts and an FR zipper on the overalls for quick removal.

INHERENT PROTECTION

The METATech® fabric is also importantly an inherent FR fabric and will never wear or wash out giving you peace of mind that as long as you are wearing it you are protected by Metatech fabric unlike some other treated FR options.



SUPERIOR COMFORT, INDUSTRIAL TOUGH

METATech® fabric solves the problem of heat stress by providing inherent certified HRC 1 – 6 Cal Arc flash protection and ISO 14116:2008 and ISO 11612:2008 flame protection at an unbelievably light 155 gsm weight.

Even though the METATech® fabric is lightweight it maintains great strength properties thanks to the use of para-aramid fibres throughout the blend. These fibres have also been used in products like Kevlar® because of its incredible strength to weight ratio.

KEY POINTS OF METATECH® FABRIC

- Lightweight and breathable 155GSM HRC 1 – 6 Cal protection
- Inherent FR characteristics that will never wash or wear out
- Tough enough to last the test of time with high abrasion and tearing resistance

MEETS STANDARDS

- ENA NENS 09– 2014
- NFPA 70E
- APTV 6 Cal rating
- ISO 14116:2008 3/5H/50
- ISO 11612:2008 A1,B1,C1

ORANGE FLAME FIRE RESISTANT RANGE

MODATech® ORANGE FLAME RANGE

The exclusive MODATech® fabric used in the Syzmik's Fire Armour® Orange Flame range gives high level of inherent HRC 2- 10 Cal protection in a fabric that is light, soft and amazingly cool.

MODATech® ‹ Look out for styles with this logo

ONLY FR RATED COMPONENTS USED

No corners have been cut when making the Syzmik Fire Armour Orange Flame range as we take the performance of our products seriously. All products in the range use fully FR rated trims including, reflective tape, snaps, buttons, zippers and even FR heat seal logos. Non FR rated closures can melt when exposed to flames, this makes the garment difficult to remove and puts the wearer at risk of greater injury.

DESIGNED TO MINIMISE EXPOSURE

The range has been designed to achieve minimal skin exposure so all products feature gusset sleeves.

GARMENTS CAN BE REMOVED QUICKLY

The garments have also been designed to be quickly removed in case of emergency so we have used FR press studs on the shirts and FR zipper on the overalls for quick removal.

ADVANCED COOLING PERFORMANCE

The use of a fibre called Tencel® in the MODATech® blend gives the fabric its incredible cooling and moisture wicking properties. The Tencel® fibre has been shown to absorb 50%* more water then cotton giving incredible moisture wicking characteristics. (Source: The fucitonal Propteries of Tencel: A Current Update 2006)

WHY IS WATER ABSORBENCY AND WICKING IMPORTANT IN KEEPING YOU COOL?

Our body's primary way to cool itself is through the creation and evaporation of perspiration. The rate at which our body's perspiration can evaporate largely controls how quickly we can cool down. Fabric that wicks or absorbs water very well allows our perspiration to evaporate quicker by moving it away from the skin and into the fabric quicker, which enhances the bodies cooling process.

SUPERIOR COMFORT, INDUSTRIAL TOUGH

At Syzmik we understand that an FR garment has to be cool and comfortable enough to wear or workers will simply not wear it.

To combat this we developed a fabric that provides outstanding moisture wicking characteristics in a light 240 gsm fabric that delivers high level HRC 2 – 10 Cal arc flash protection as well as ISO 14116:2008 and ISO 11612:2008 certified flame protection.

KEY POINTS OF MODATECH® FABRIC

- Cool and comfortable 240GSM HRC 2 – 10 Cal protection Inherent
  FR characteristics that will never wash or wear out
- Highly moisture wicking fabric
- Soft to touch
- Tough enough to last the test of time with high abrasion and tearing resistance
